Operator's Manual

Original operator's manual

Using the operator's manual

This is the original operator's manual. It will simply be referred to as the "operator's manual" throughout this document.

This operator's manual complies with currently enforced regulations in the tractor's first country of delivery.

This operator's manual contains the instructions for using, adjusting, servicing, cleaning and transporting the tractor. It is essential to be familiar with all of these instructions in order to:

- improve the output of the tractor.
- increase the tractor's availability.
- prolong the tractor's service life.
- Ensure the correct working conditions in terms of both safety and comfort.

If any maintenance operations are missed or if the tractor is used incorrectly, the following is possible:

- An increased safety risk.
- Premature wear of the tractor.
- A reduction in tractor performance.
- Loss of output and time.

Have the tractor service performed regularly by an approved CLAAS distributor.

This operator's manual cannot be considered contractual. CLAAS has a policy of continuous technical improvement to all its products, and therefore reserves the right to change the details contained in this operator's manual without notice and at any time.

The description of the models contained in this operator's manual was established from technical specifications known at the time this operator's manual was written. The operator's manual contains all of the equipment (standard or optional) that exists for these models. The presence of this equipment in the tractor depends on the tractor version and options chosen by the purchaser and the country of sale for this tractor.

Servicing operations during the warranty period are mandatory; failure to carry them out will nullify the contractual warranty.

Failure to observe the instructions for use and maintenance of the tractor as described in this operator's manual definitively excludes any possibility of recourse to the CLAAS warranty system.

The instruction and warning plates affixed to the tractor give important information about possible risks relating to use. Following these instructions will guarantee your complete safety during use!

Front/rear implements have a separate operator's manual.

The CLAAS distribution network is available to respond to any questions that you may have relating to the content of this operator's manual.

Important information concerning this operator's manual appears at the end of the manual:

	Description
1	Address of CLAAS company headquarters
2	Phone number to call if necessary
3	Address of CLAAS company website
4	Reference of this operator's manual
5	Designation of this operator's manual
6	Language code for this operator's manual
7	Publication date of this operator's manual
8	Country where this operator's manual was printed

The reference, designation and publication date of this operator's manual also appear at the bottom of each page of the operator's manual. The reference of the operator's manual should be quoted in any query concerning the operator's manual and when ordering additional copies.

Structure based on tractor sub-assemblies

The sections in this operator's manual are categorised on the basis of the tractor sub-assemblies, as far as the contents permit. These sub-assemblies are structured identically in each section of this operator's manual.

The operator's manuals for CLAAS products are structured differently depending on the group of products to which they refer. CLAAS always endeavours to retain this sub-assembly-based document structure for each of its products.

Search and find

Thanks to this module-based structure, it is easier and quicker to find the desired subject using the table of contents and the headers in this operator's manual.

Furthermore, the index of this operator's manual is another useful tool for finding subjects. The index is found in the final pages of this operator's manual.

Direction indications

Indications such as front, rear, right-hand and left-hand are always in the context of the direction of travel of the tractor.

In the illustrations, the direction of travel may be indicated by a direction arrow.

Specific terminology

In this operator's manual, "implement" refers to any equipment hitched to the tractor, whether carried or towed.

Likewise, the term "risk zone" refers to all locations with an increased risk of accident:

- around the tractor and the implements hitched to the tractor.
- between the tractor and the carried/towed implements.
- in the deployment or movement area of the implements.

Optional and additional equipment

Optional equipment consists of tractor equipment variants. Different variants are available but only one can be fitted at a time.

Additional equipment consists of tractor equipment variants which can be fitted as accessories but which are not part of the tractor's standard equipment.

The two terms refer to the possible variants. Standard equipment and equipment variants may vary depending on the country.

Validity of the operator's manual

This operator's manual is valid for the following tractors:

Type of tractor	Type	Tractor serial number	
		From	To
AXION 800	A30	A3000612	
	B02	B0200050	

Consult the tractor's serial number given on the tractor identification plate, which is located on the rear panel of the tractor cab.

Spare parts and technical questions

The tractor operator's manual describes the possible equipment for your tractor. The tractor equipment is listed in the order confirmation.

Technical information

The technical specifications, dimensions and weights are provided on a non-binding basis. CLAAS reserves the right to modify them as part of technical development, subject to errors.

Appropriate use

CLAAS's AXION 800 range of farm tractors has been designed exclusively for professional use in line with the recognised rules governing farming practices and agricultural work.

The AXION tractor has been designed and adapted to tow, push, move, or carry the implements/equipment/loads authorised by the manufacturer, and to control certain implements or compact using implements (weights) authorised by the manufacturer as part of agricultural work.

The farm tractor must only be used, maintained and repaired by persons with a thorough knowledge of the tractor, who are aware of the possible risks.

Appropriate use also supposes the observance of the instructions contained in the operator's manual, as well as the operating, maintenance and repair regulations laid down by the manufacturer.

Specific accident prevention instructions, as well as general rules concerning technical safety, health and safety regulations and the highway code, must be observed by the user and owner.

Any use other than that defined above will be considered inappropriate and will release the manufacturer from any liability in the event of damage or injury; the user alone will bear the risks resulting from such misuse.

Contact an approved CLAAS distributor to guarantee correct use of the tractor in specific applications.

Inappropriate use

Any use not foreseen by the manufacturer shall be considered to be inappropriate, and therefore incorrect. The manufacturer accepts no liability in the event of damage or injury; such use is entirely at the user's own risk.

Examples of inappropriate use of CLAAS tractors/farm tractors from the AXION 800 range:

- use of surfaces or spaces not defined as working or maintenance areas in the operator's manual.
- failure to follow the information in the operator's manual when performing adjustment, cleaning or maintenance operations.
- carrying out breakdown or maintenance work while the system is in operation and/or the engine is running.
- non-compliance with the warnings on the tractor or in the operator's manual.
- untrained persons carrying out maintenance or repair work.
- unauthorised modifications to the tractor.
- installation of unauthorised equipment.
- use of replacement parts other than original CLAAS parts.
- use of devices / equipment not authorised by the manufacturer.
- use of implements / devices / equipment which are not compatible with each other.
- use in sporting events.
- exceeding the total technically permissible weight.
- transporting persons outside of the seats intended for this purpose.
 - o Depending on the tractor equipment, a passenger seat may be used to transport one person.

European regulation

AXION 800 tractors put in circulation meet modified European Directive 2003/37.

For countries which do not form part of the European Union, respect the relevant applicable national prescriptions.
