This diagram illustrates the assembly of a motorcycle seat. The main components are the seat shell (1), the seat base (11), and the seat cushion (23). The seat shell is secured to the base with bolts (2) and washers (3). The seat base is attached to the frame with a bracket (4) and a bolt (5). The seat cushion is mounted on the base with a bracket (10) and a bolt (11). The seat base is also secured to the frame with a bracket (12) and a bolt (13). The seat base is further secured with a bracket (14) and a bolt (15). The seat base is also secured with a bracket (16) and a bolt (17). The seat base is also secured with a bracket (18) and a bolt (19). The seat base is also secured with a bracket (20) and a bolt (21). The seat base is also secured with a bracket (22) and a bolt (23). The seat base is also secured with a bracket (24) and a bolt (25). The seat base is also secured with a bracket (26) and a bolt (27). The seat base is also secured with a bracket (28) and a bolt (29). The seat base is also secured with a bracket (30) and a bolt (31).

*Note 1: For use with 17.5 x 25 tyres*

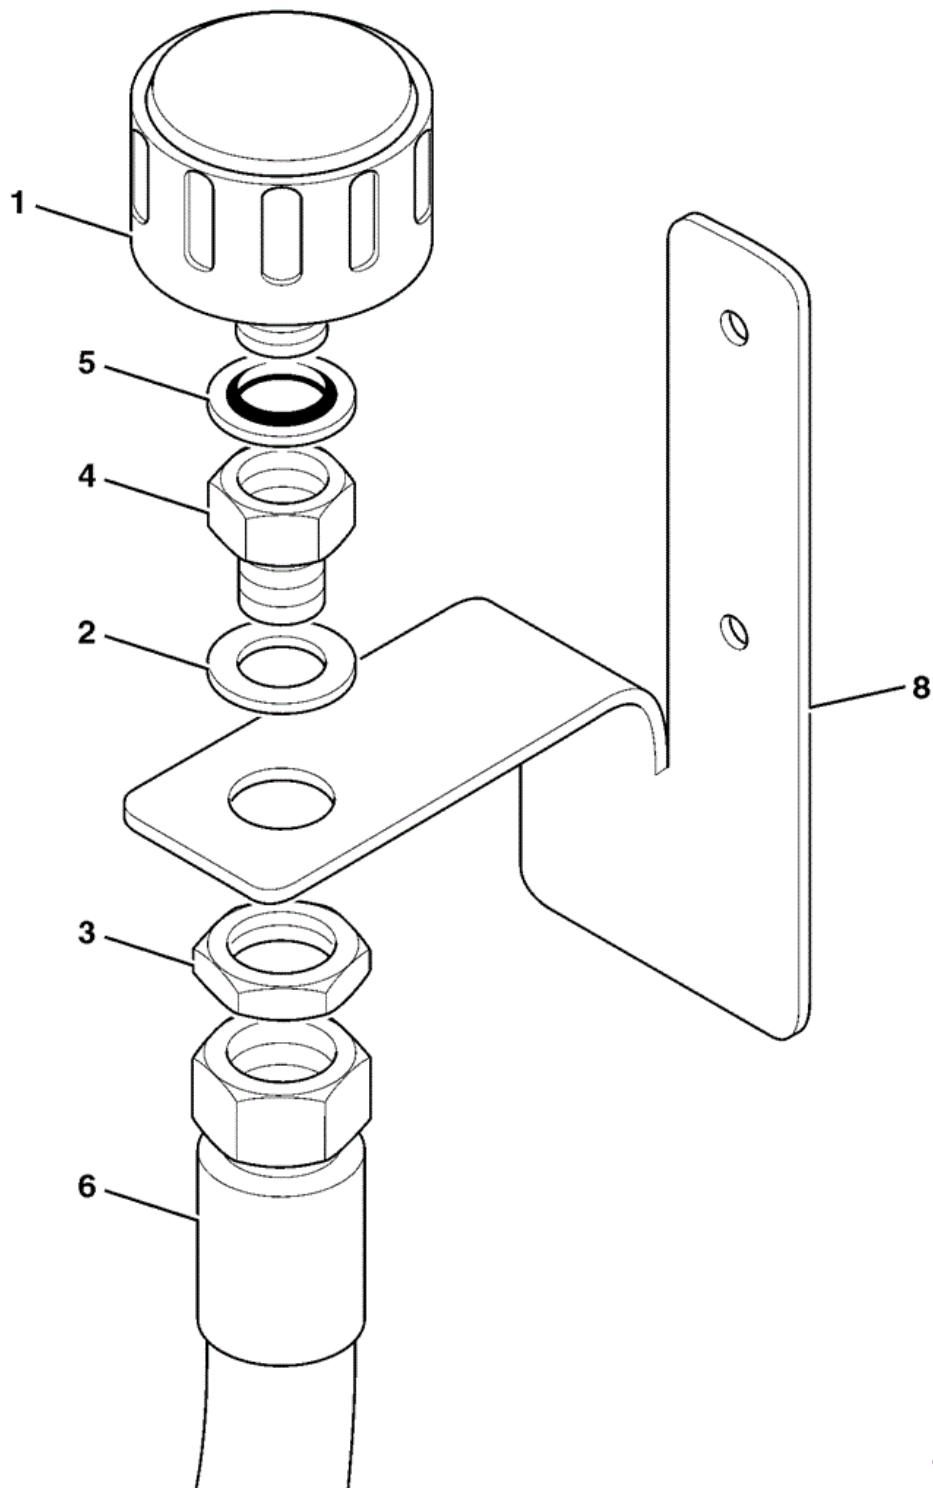

This exploded view diagram illustrates the assembly of a metal safe. The components are numbered as follows:

- 1**: The main body of the safe, shown with its front door open.
- 2**: The top cover of the safe.
- 3**: A long threaded bolt used for the door latch.
- 4**: A lock cylinder or plug.
- 5**: A lock nut or washer.
- 6**: A small internal component, possibly a pin or spring.
- 7**: A keyhole cover or escutcheon.
- 8**: A key.
- 9**: A small internal component, possibly a pin or spring.
- 10**: A keyhole cover or escutcheon.
- 11**: A key.
- 12**: The front door of the safe.
- 13**: The interior of the safe.
- 14**: A long threaded bolt used for the door latch.
- 15**: A lock nut or washer.
- 16**: A small internal component, possibly a pin or spring.
