NEW HOLLAND

Fiatagri. The specialist Agriculture Division of FiatGeotech.

Fiatagri is now the specialist agricultural machinery division of FiatGeotech, the new Fiat group company formed on January 1st 1988 to head the earth technology sector and unify, rationalize and expand the group's activities in agricultural and earth-moving equipment, previously developed separately by Fiatagri and Fiatallis.
The Fiatagri Division name represents the combination of all the prestige of the trademarks borne by the products which represent it out in the field: Fiat and Agrifull tractors, Laverda combinè harvesters, Hesston hay and forage machinery, and Braud multi-purpose trailed and self-propelled grape-harvesters.
So Fiatagri, with Europe's most complete advanced full-line, is a real specialist, responsible for the design, production and marketing of its product lines.
It draws on the common structures made available by FiatGeotech, which provide the resources and economies of scale for further product developments.
Experience, tradition and constant innovation have made Fiatagri products undisputed leaders at a worldwide level and above all in Europe, with rankings and market shares which best demonstrate their continuing standing with farmers everywhere.

Organisation, pièces de rechange et assistance après-vente, toujours proche de l'exploitant

Quand on achète une machine agricole Fiatagri, on achète aussi quelque chose qu'on ne voit pas, mais dont on pourra apprécier à l'avenir les avantages: une grande organisation efficace pour l'assistance après-vente et la distribution de pièces de rechange.
Dans le Centre de Pièces de Rechange de San Matteo Modène, un complexe très moderne qui dispose de 30 000 m^2 de surface couverte équipé de systèmes électroniques de manutention et de prélèvement, sont stockées plus de 220 000 références pour un total de 21 millions de pièces. Ce Centre est à même de satisfaire 6 000 demandes par jour. À l'efficacité de l'organisation et à la vitesse du service vient s'ajouter la qualité supérieure des pièces de rechange d'origine Fiatagri, une qualité qui maintient inchangée avec les années la valeur des machines agricoles Fiatagri.

Service

An extended network of **FIATAGRI Authorized Shops,** equipped with all necessary means to perform any repair and overhaul work, is at your disposal.

Turn to these shops in full confidence. You will benefit from the assistance and know-how of skilled servicemen. FIAT's experience is at your service to help you solve any problem related to tractor operation and use.

Spare Parts

Use genuine FIATAGRI parts only.
Failure to do this will:
— Cost you more.
— Not result in complete satisfaction.
— Seriously risk improper functioning of the tractor.
Original spares are sold by the FIATAGRI Sales and Service Organization.
In all orders be sure to quote (see page 7):
— Tractor Model and Frame Number.
— Engine Type and Number.
— The Part No. of the spare needed (listed in the Spare Parts Catalog).

Maintenance

35—66 tractors were designed with the owner in mind and an effort has been made to simplify maintenance.

The purpose of this manual is to familiarize the operator with the operation and regular servicing of the tractor.

Remember that the time spent on maintenance extends the life of your tractor.

Pay particular attention to the instructions covering fuel filtering, air cleaner maintenance and lubrication: remember that badly filtered fuel results in injection system deterioration and irregular air cleaner maintenance leads to premature engine wear, and reckon that a tractor oil change every 200 hours is equivalent to a truck oil change every 8,000 to 9,000 km.
