Reprinted

# TRACTOR PERFORMANCE MONITOR

This Supplement gives information and operational details for your Ford Tractor Performance Monitor. Use this Supplement to programme and calibrate your Performance Monitor so you obtain maximum benefit from the information displayed. For example where slip exceeds the value you have set, a change of gear, or of engine speed and or ballast may result in less slip, less tyre wear and lower fuel consumption.

For all other information about your new tractor consult the appropriate Operator's Manual.

## SAFETY PRECAUTIONS

**WARNING:** *The Radar Ground Speed Sensor emits a low intensity microwave signal which will not cause any ill effects in normal use. Although the intensity of the signal is low DO NOT look directly into the face of the sensor while in operation so as to avoid any possibility of eye damage.*

**IMPORTANT:** *To avoid equipment damage, if an arc welder is used on your tractor or to an implement or equipment attached to your tractor, disconnect all power and ground leads which provide power for all elements of your Performance Monitor otherwise damage can result to electronic components.*
