Series MXM Operator's Manual Supplement

INTRODUCTION

This Supplement details new features that are available to enhance the specification of tractors in the Case MXM range.

The Supplement should be read in conjunction with the Operators Manual supplied with the tractor.

Read the Supplement carefully and keep it, together with the Operators Manual, in a convenient place for future reference.

If at any time you require advice concerning your tractor, do not hesitate to contact your authorised Case IH dealer. He has factory trained personnel, genuine parts and the necessary equipment to carry out all your service requirements.

The sections within this Supplement are numbered to match those of the Operators Manual. However, only those sections where changes have occurred will appear in the Supplement.

SECTION 3

Subject	Page
Headland Management Control	3-2
Auto PTO Control	3-9
Electro-Hydraulic Remote Valves	3-11

SECTION 3

FIELD OPERATION

BEFORE OPERATING

Before driving or operating the tractor, study the safety precautions in Section 1 of the Operators Manual.

Subject

Headland Management Control

3-2

Auto PTO Control

3-9

Electro-Hydraulic Remote Valves

3-11

This supplement updates the information contained in your tractor Operators Manual and should be used in conjunction with that publication.

It may help if you identify the relevant sections and pages in the Operators Manual where the new information applies so you can be sure to consult the supplement wherever necessary.

As far as possible, the order in which the subjects appear in the supplement will follow that of the Operators Manual.

Do not start the engine or attempt to drive or operate the tractor until you are fully accustomed with all the controls. It is too late to learn once the tractor is moving. If in doubt about any aspect of operation of the tractor, consult your authorised dealer.
