- Put cover (6) in position on the final drive.

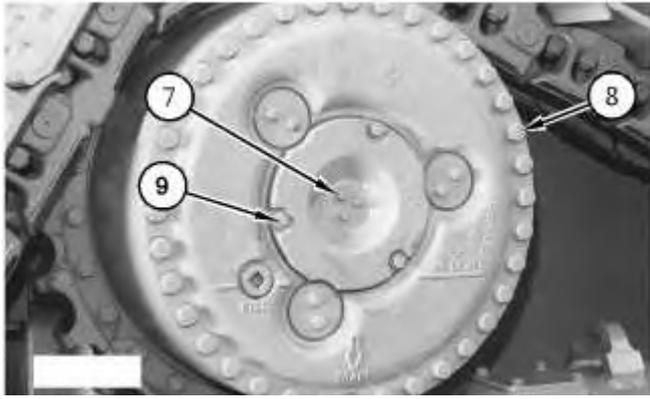

Illustration 4

g06301027

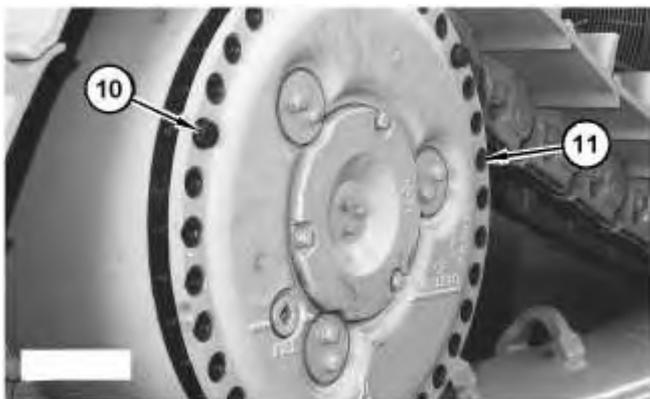

- Install three bolts (7). Install three bolts (9) that hold cover (6) to the final drive. The cover, the spiral locking, the retainer, and the ring must be installed to hold both carriers together during the removal. One carrier may be free to drop if this procedure is not followed.
- Remove three bolts (8) that are an even distance from each other on the final drive.

Illustration 5

g06301038

- Install three bolts that are 3/4 inch - 10 NC x 3.5 inch in the final drive. Remove the remainder of bolts (8).

7. Use a pry bar to move out planetary carrier (11). Move out planetary carrier (11).
