## TO PURCHASERS OF CASE MOWERS

Congratulations on your purchase of a CASE Mower and welcome to the ever-increasing number of satisfied CASE owners.

The dependability and economical performance of your new CASE Mower will prove that you were wise in making this choice.

The organization back of your mower has been building quality equipment for more than a century. Your CASE Mower was built in one of the largest and best equipped plants in the world. In this factory, quality materials, precision machinery, high grade workmanship, thorough inspection, and complete testing equipment are combined to give you the best in performance and economical operation.

The care which you give your mower will have a great deal to do with the service and satisfaction you get from it. By observing the precautions and suggestions in this manual, your CASE Mower will serve you well for many years. Make this manual your guide. Should you need information not covered here, or should your mower require special servicing, contact your CASE Dealer. He has trained men who are kept informed on the best methods of servicing CASE Farming Equipment in the field or in his shop.

When it becomes necessary after long use to replace certain parts on your mower, be sure to use only genuine CASE Parts, thus insuring proper fit and continuous good service. These may be obtained from your CASE Dealer. It is always helpful to provide him with the Model of your mower in addition to a description and part number, if available, of the parts required.

## INTRODUCTION

The CASE Number 10 Semi-Mounted Mower is designed for quiet, smooth running and clean mowing for extended periods with a minimum of upkeep. The heavy duty frame and anti-friction bearings together with cushioned "V" belt drive are designed to withstand as well as minimize the vibration inherent in a Mower.

Both the inner and outer shoes float independently of the lift controls, whether manual or hydraulic. The inner shoe can pass over a bump or drop in a depression, while the outer shoe continues to follow the contour of the ground - even on banks where the outer shoe may be higher or lower than the tractor wheels.

Long coil spring and gag lever mechanism is easily adjustable to provide positive floating action at all times.

Pressure lubrication is provided at the points of maximum speed or maximum movement.

A safety break-back feature protects the cutter bar against breakage should it strike an obstruction. The knife continues to operate - thus clearing the bar and it is only necessary to back the tractor to automatically latch the cutter bar back in its proper operating position.

Complete and simple adjustments are provided to assure the best possible mowing job under all conditions.

The Number 10 Mower is easily and quickly attached to CASE as well as most other makes of tractors making it possible for the owner to utilize the mower on two different types of tractors, if desired.

Extra equipment for this mower includes a wide variety of cutter bars, knives and guards, a high cutting attachment and windrowers.
