FOREWORD

It is the policy of the Case Co. to build machines with long and useful life expectency. The reputation of this company and their products are dependent upon the diligent and conscientious maintenance given these products by the field service people.

Thousands of satisfied users have proven the design and quality of the Case products. In the final analysis it will be the field service personnel that will write the final chapter to the success story.

The Case Co. recognizes the importance of the thoroughly trained technician. No longer is the mechanic considered as a "grease monkey" or the "necessary evil". To elevate the service man to his rightful place in the Professional field the company has inaugurated a "Mobile Training Program". This program has been highly successful and very fruitful. The Case Co. now is planning even greater and far more reaching programs to further this endeavor.

Service Representatives for the Case Co. and its Dealers Servicemen are located all over the world and they represent the finest in Service Personnel. This Service Manual has been written as a reference guide, and is dedicated to those that service, maintain, and teach the Case Industrial Equipment.
