

## Alternator, fuel pump, water pump and fan drivebelt

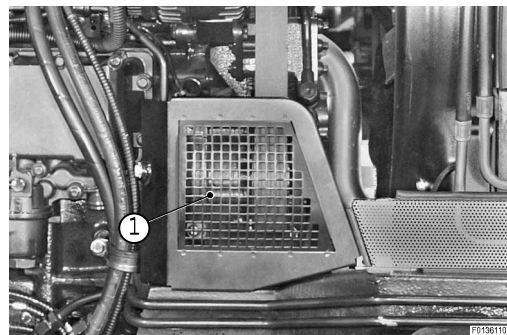

### Removal

#### DANGER

1. Disconnect the lead from the battery negative terminal (-).

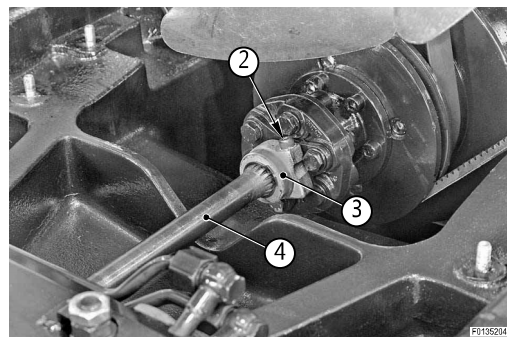

Remove right-hand guard (1).

- 2.

Only for versions with front PTO

Remove screw (2) and move sleeve (3) and propeller shaft (4) to disengage it from the drive coupling.

- 3.

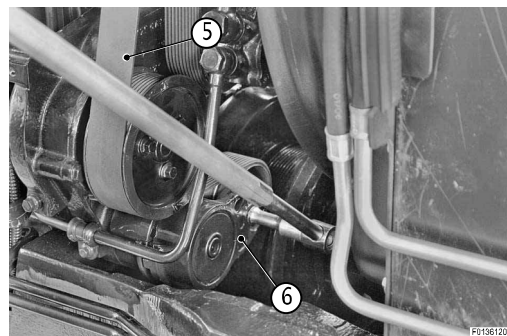

Using a "T" bar and a 1/2" extension, rotate the belt tensioner clockwise and disengage belt (5) from the alternator pulley.

#### NOTE

Alternatively it is possible to use a 1/2" angle bar inserted in the location provided in belt tensioner (6).

Remove drivebelt (5).

- 4.

### Refitting

Refitting is the reverse of removal.

## Air conditioning compressor drivebelt

### Removal

#### IMPORTANT

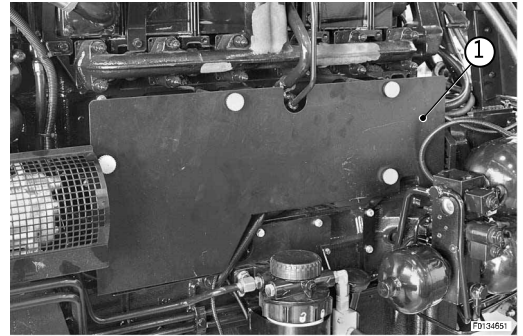

1. The belt must be renewed at the first signs of wear. Check for fraying, cracks and separation of the belt plies.

#### DANGER

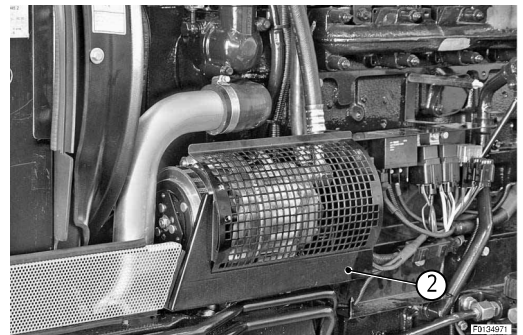

2. Disconnect the lead from the battery negative terminal (-) and apply the parking brake.

Remove cover (1).

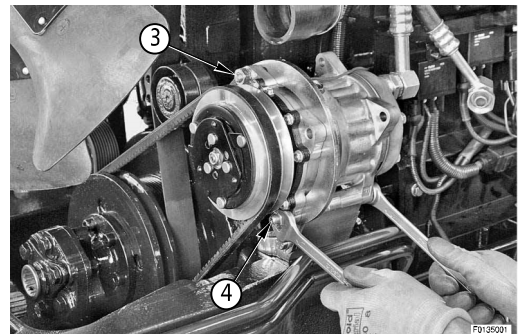

3.

Remove cover (2).

4.

Loosen lock nut (3) and pivot screw (4).

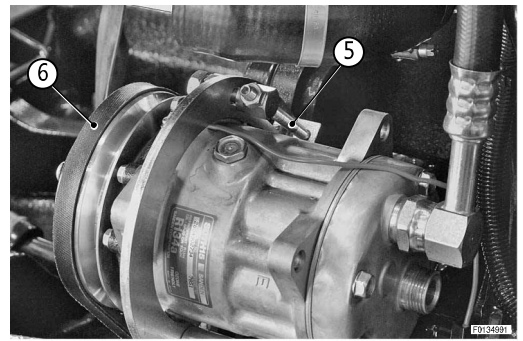

5.

Unscrew threaded rod (5) of the tensioner to slacken compressor drivebelt (6).

#### IMPORTANT

Slacken the drivebelt sufficiently to be able to slip it off the compressor pulley.

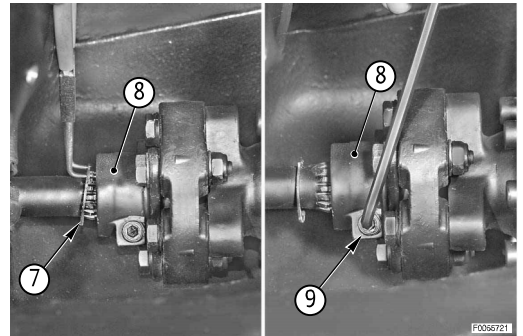

6.

Only for versions with front PTO

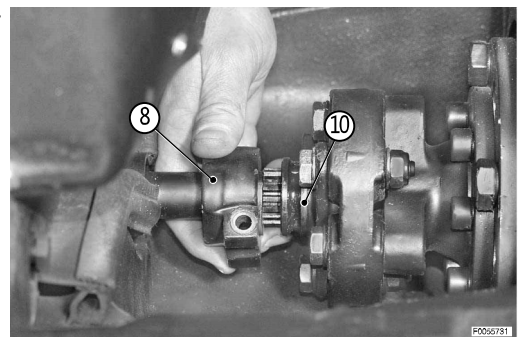

Remove circlip (7) securing collar (8).

Unscrew and remove screw (9) securing collar (8).

7.

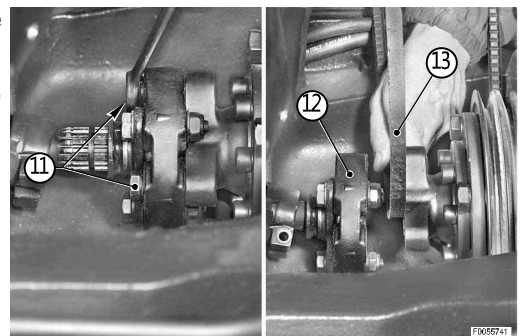

Move collar (8) towards the front of the tractor, recovering the thrust washer halves (10).

8.

Unscrew and remove screws (11) and disconnect the coupling (12) from the engine flange.

Slide the coupling along the shaft to create sufficient clearance to remove drivebelt (13).

9.

## Refitting

Refitting is the reverse of removal.
