

642 FLEXIBLE ROTARY HOE

OPERATOR'S MANUAL

OMN159067
LITHO IN U.S.A.

TO THE PURCHASER

The purpose of this manual is to acquaint you with the operation of your new John Deere Flexible Rotary Hoe.

We know that you had definite reasons for buying the John Deere Flexible Rotary Hoe, and we like to think that among them was the fact that your rotary hoe was made by an organization that has always pioneered in the development of dependable, efficient farm machines, which have been fully proved in the field before they were offered to the farmer. The John Deere Flexible Rotary Hoe is no exception to this rule. The Rotary Hoe that you have just purchased is a fine piece of farm equipment and was designed by men who understand farming conditions and have the interest of the farmer at heart.

Many growers consider the rotary hoe an indispensable and unexcelled tool for the early cultivation of all kinds of row-crops such as corn, beans, peas, cotton, tobacco, and sugar beets; also mint, clover, alfalfa, and other field crops. It is unequalled for maintaining proper tillage conditions in seedbeds from the time they are ready for seeding until the crop is large enough for safe cultivation with shovel cultivators. The 642 Flexible Rotary Hoe will provide the flexibility needed to thoroughly cultivate bedded or listed ground and will do an equally thorough job on flat land.

When in need of parts, either to replace worn parts or to make emergency repairs, see your local John Deere dealer; he and the John Deere branch house behind him are equipped to provide high quality parts and service.

Date of Purchase 19.

Study this manual carefully and keep it handy in a safe place for future reference.
