FOREWORD

The purpose of this book is to give you useful information on how best to operate your new John Deere No. 127 Corn Picker in the many field and crop conditions under which corn is grown.

A Corn Picker must be built to handle a wide range of conditions. Average conditions can be handled by the standard equipment with which picker is shipped. However, unusual conditions may require some special equipment. Your new No. 127 will do a type of work directly proportional to the amount of care you use in operating it.

Field conditions vary from year to year, from day to day and even from hour to hour. Different varieties of corn present widely different picking problems. A careful study of adjustments on your picker and what they accomplish under different conditions will allow you to reap the many benefits and economies that a picker can provide.

If you find you need information not covered in this manual, see your John Deere dealer. He has the latest information on how to get the best service from your picker and can give you prompt "know-how" service in the field or in his shop.

When in need of parts, go to your John Deere dealer who carries genuine John Deere parts for your corn picker. Be sure to give him the serial number of your corn picker and the year purchased. This information should be recorded in the space provided on this page as soon as you have received your picker.

Location Reference: Right and Left-hand referred to in this manual, are determined from a position at the rear of the machine facing in the direction of travel.

Serial Number of This Picker is:

127—

Date Purchased _____

You will find the Serial Number Plate on the outer main frame as illustrated at the right.

JOHN DEERE DEALER'S DELIVERY REPORT

on the

No. 127 CORN PICKER

The John Deere No. 127 Corn Picker has been designed and built to give years of satisfactory service. Intelligent operation, proper adjustment, and regular care by the operator are important factors in obtaining peak performance and long service from the picker.

By the use of this delivery report you can insure that your customer understands the operation, adjustment, and care of his new corn picker. It will also provide valuable information that will enable us to continue to design and build corn pickers to meet your customer's needs.

The delivery report is divided into three parts. The use and purpose of each part is explained below:

Part 1, below, provides space for recording the customer's and dealer's names and addresses, and the serial number of the corn picker. This information should be recorded before delivering the corn picker.

Part 2, on the reverse side, is a delivery check list of the points which should be explained to the owner about his new corn picker. Discuss each point fully to be sure the owner understands the use of the corn picker. Point out that each item is discussed in the operator's manual. (It would be a good idea to go through the manual with him.) As each point is discussed, put a cross (X) in the box provided.

Part 3, also on the reverse side, covers the farming operations of the new owner. The information obtained about his farming operations will help us continue to produce corn pickers best suited to the various types of farming and the use which will be made of the picker. Please record accurate answers to each question in the appropriate boxes.

When the delivery report has been completed, it should be signed by both the owner and the dealer. Give the completed form to your John Deere territory manager who will see to it that the form is returned to the Company.

Thank you.

JOHN DEERE
Moline, Illinois

- Slip clutches—adjustment.
- Fan belt idler adjustment.
- Wagon elevator height.
- Mounting and dismounting the picker.
- Tractor tire pressures and rear wheel tread.

3. CUSTOMER'S FARMING OPERATIONS

The John Deere No. 127 Corn Picker has been designed to serve the customer's needs efficiently and effectively. We want to continue to design and build corn pickers to meet his needs. To help us determine these needs, please obtain the answers to the following questions about the new owner's operations:

- | | |
|--|---|
| <p>1. Total acreage in customer's farm: _____
(Acres)</p> <p>2. Is the farm mostly: (Check one)</p> <p style="padding-left: 40px;">Hilly _____ <input type="checkbox"/></p> <p style="padding-left: 40px;">Rolling _____ <input type="checkbox"/></p> <p style="padding-left: 40px;">Level _____ <input type="checkbox"/></p> <p>3. Does the customer contour his farm?</p> <p style="padding-left: 40px;">Yes <input type="checkbox"/></p> <p style="padding-left: 40px;">No <input type="checkbox"/></p> <p>4. How many acres does customer put in corn? _____
(Acres)</p> <p>5. What yield does customer usually expect? _____
(Bu. per Acre)</p> <p>6. How many acres does he usually cut for silage? _____
(Acres)</p> <p>7. Will the customer:</p> <p style="padding-left: 20px;">Pick own corn only _____ <input type="checkbox"/></p> <p style="padding-left: 20px;">Custom work only _____ <input type="checkbox"/></p> <p style="padding-left: 20px;">His own and custom work _____ <input type="checkbox"/></p> <p>8. How many acres of custom work does he expect to pick? _____
(Acres)</p> | <p>9. Is this the first corn picker the customer has owned? (Check one)</p> <p style="text-align: right;">Yes <input type="checkbox"/></p> <p style="text-align: right;">No <input type="checkbox"/></p> <p>10. Is this his only corn picker? (Check one)</p> <p style="text-align: right;">Yes <input type="checkbox"/></p> <p style="text-align: right;">No <input type="checkbox"/></p> <p>11. If this isn't his only corn picker, what others does he have?</p> <p style="padding-left: 20px;">Make _____ Model _____</p> <p style="padding-left: 20px;">Make _____ Model _____</p> <p style="padding-left: 20px;">Make _____ Model _____</p> <p>12. Is the John Deere No. 127 replacing another picker? (Check one)</p> <p style="text-align: right;">Yes <input type="checkbox"/></p> <p style="text-align: right;">No <input type="checkbox"/></p> <p>13. If it is replacing another, what is it?</p> <p style="padding-left: 20px;">Make _____ Model _____ Age _____ Yrs.</p> <p>14. What tractor will customer use with his No. 127 picker?</p> <p style="padding-left: 20px;">Make _____ Model _____ Age _____ Yrs.</p> |
