#### FOREWORD

The purpose of this manual is to give you useful information on how to operate your new John Deere 18 Corn Picker in the many field and crop conditions under which corn is grown.

A corn picker must be built to handle a wide range of conditions. Average conditions can be handled by the standard equipment with which the machine is shipped. However, unusual conditions may require some special equipment. Your new machine will do a type of work directly proportional to the amount of care you use in operating it.

Field conditions vary from year to year, from day to day, and even from hour to hour. Different varieties of corn present widely different picking problems. A careful study of adjustments on your picker and what it will accomplish under different conditions will allow you to reap the many benefits and economies that a picker can provide.

If you find you need information not covered in this manual, see your John Deere dealer. He has the latest information on how to get the best service from your picker and can give you prompt "know-how" service in the field or in his shop.

When in need of parts, go to your John Deere dealer who carries genuine John Deere parts for your corn picker. Be sure to give him the serial number of your machine and the year purchased. This information should be recorded in the space provided on this page as soon as you have received your picker.

#### Serial Number..... Date Purchased.....

You will find the Serial Number Plate on the left-hand outer wagon drawbar frame as illustrated at the right.

John Deere 18 Corn Picker

## SPECIFICATIONS

No. of rows Right- or left-hand machine	1 Right-hand	
Lift mechanism	Hand lift or hydraulic remote cylinder	
Distance from tractor drawbar hitch hole to corn row		
Gatherer points hinged or rigid	Hinged	
Gatherer points hinged above or below gatherer chain	Above	
Gatherer points, height of lift at hinge point (adjustable)		
No. of gatherer chains	3	
Type of gatherer chains Minimum clearance between gatherer	Steel link detachable	
chains and ground Gatherer chains ahead of snapping roll	0 inches and up	
entry		
Length of snapping rolls (including points)		
Snapping roll adjustment		
Type of first elevator conveyor		
No. of husking rolls		
Diameter of husking rolls		
Length of husking rolls	27-1/2 inches	
Type of husking rolls: Rubber roll	Spiral grooved and notched	
Mating rubber roll		
Cleaning fan		
Depth ear corn elevator	P	
Width ear corn elevator		
Wagon elevator location	In line with tractor	
Shelled corn saver	Incorporated with husk auger and housing	
Width over-all of picker	7 feet, 9 inches	
Length from tractor hitch point to wagon hitch point	10 feet, 7-1/2 inches	
Length including wagon elevator	18 feet	
*Height less wagon elevator		
*Height to top of wagon elevator	9 feet, 9 inches	
Tractor power requirement	John Deere "430," or larger or	
	equivalent (tractor can be	
	equipped with 540 or 1000 rpm PTO)	

\*Adjustable wheel brackets in the 4-inch raised position.

(Specifications and design subject to change without notice.)
